PROJECTS

Chicken Traders (class group project)

JavaScript, HTML, CSS, Python – Frameworks: Python Flask

Sept. 2019 - Present

jeffreytram.pythonanywhere.com

- Led the team by guiding team meeting discussions, organizing meeting times, allocating tasks, and checking up on team members to ensure the success of our project
- Designed the home, setup, ship, travel, market, and encounter pages using HTML, CSS, and JavaScript
- Created a customized interactive map using the Leaflet.js library
- Connected the front-end and back-end using XML HTTP Requests and Python Flask

Weather App (personal project)

JavaScript, HTML, CSS

Aug. 2019

github.com/jeffreytram/Weather-App

- Built a web app that allows users to view the current and past weather conditions at their current location
- Uses Dark Sky API for weather and location data
- Uses Nominatim API to convert location data into an address

Grade Manager (personal project)

JavaScript, HTML, CSS

June 2019 – July 2019

github.com/jeffreytram/Grade-Manager

- Built a web app to allow students to manage and calculate their grades as the semester progresses
- Planned the user interface by sketching the design in a notebook
- Implemented a responsive UI in HTML and CSS
- Designed the front-end logic in JavaScript

MovieRatings (class group project)

HTML, CSS, Python

June 2018 – July 2018

github.com/avgit77/CSC2720-Group-Project

- Designed a web app that allows users to search for movies, add them to their personal list, and give the movie their personal rating.
- Responsible for the front-end development from the conception to execution
